About XTREME

Professional Display & Integrated Technology Solutions

XTREME delivers professional display and integrated technology solutions for corporate, government, commercial, retail, hospitality, education, and public environments. Our portfolio includes LED displays, interactive screens, retractable display systems, integrated solutions, and manufacturing support backed by technical expertise, project integration, and after-sales service.

Why Choose Us

Quality & Reliability

Solutions designed for consistent performance, durability, and long-term use.

Integrated Solutions

A complete portfolio covering display, collaboration, AV, UC, and integrated technology solutions.

Manufacturing Capability

Manufacturing and quality processes support scalable, project-ready solutions.

Technical Support

Support across configuration, installation, commissioning, training, and after-sales service.

XTREME

Our Solutions & Capabilities

A complete portfolio of display, collaboration, and integrated technology solutions for corporate, government, commercial, retail, hospitality, education, and public environments.

01

LED Displays

High-impact indoor and outdoor LED display solutions with flexible configurations, multiple pixel pitches, and scalable designs for corporate, retail, events, education, and public spaces.

02

Interactive Screens

4K interactive displays designed for intuitive collaboration, teaching, training, and meetings, with multi-touch, wireless sharing, educational software, device management, and flexible size options.

03

Retractable Screens

Space-saving retractable display solutions combining elegant integration, ease of use, customizable nameplate options, and flexible installation for meeting rooms, training facilities, and professional environments.

04

Providing Solutions

Integrated solutions for broadcasting studios, conference rooms, control rooms, digital media, glasses-free 3D, XR and VR studios, and variable message signs.

05

Manufacturing & Quality

Manufacturing, testing, quality assurance, and technical support capabilities designed to support reliable performance, consistent quality, and scalable project delivery.

XTREME

LED Displays
