INTERACTIVE LED DISPLAY SOLUTIONS

XD-C Series

All-in-one COB Interactive LED Display

108" / 135" / 162"

FLIP CHIP COB

2K / 4K OPTIONS

INTERACTIVE TOUCH

Product overview, collaboration features, installation options and complete technical specifications.

Choose your screen size.

Three standard sizes with a 16:9 aspect ratio for meeting and presentation spaces.

108"

135"

162"

Size	2K pixel pitch	4K pixel pitch
108 inch	1.25 mm	0.62 mm
135 inch	1.56 mm	0.78 mm
162 inch	1.87 mm	0.93 mm

Pixel pitches above follow the feature page. Exact values in the specification tables are retained on page 8, including the source difference for 162-inch 4K.

Remote control

Convenient screen operation

Screen mirroring

Wireless content sharing

Video conference

Dual-system collaboration

Cinema-grade visual quality.

Flip chip COB technology, a wide colour gamut and high contrast for vivid detail.

Normal All-in-one | **UT-C Series All-in-one**

DCI-P3 colour gamut

Wide colour reproduction for a vivid visual experience.

10000:1 contrast ratio

Contrast condition: without lighting, as stated in the specifications.

The all-in-one display uses flip chip COB technology to deliver vivid images and restore fine detail. The source describes energy-saving operation, comfortable viewing and support for paperless meetings.

The comparison image is labelled “UT-C Series All-in-one” in the source; the brochure cover identifies the product as XD-C Series.

Dual systems. Connected audio.

Android and Windows workflows with support for external collaboration devices.

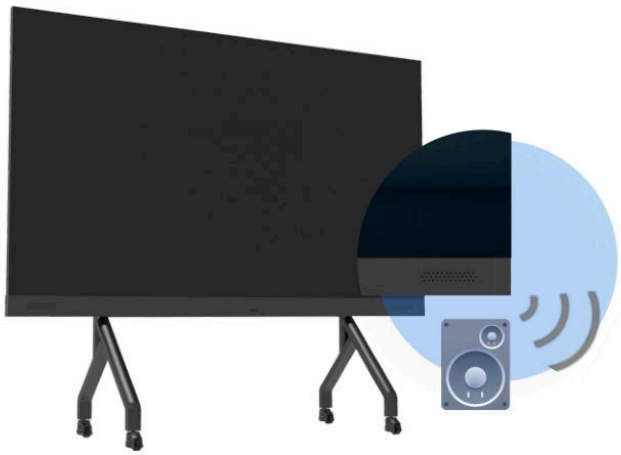

SWITCHABLE OPERATING SYSTEMS

The feature page describes Android and Windows 10 with flexible switching. The technical tables list Android 11 for 2K, Android 13 for 4K, and Windows as optional. Confirm the supplied configuration.

Immersive stereo surround sound and cinema-grade audio effects.

External cameras, microphones and other devices can be connected.

AUDIO / SPEAKER / CAMERA / INFRARED SENSOR

Share content. Write naturally.

Wireless projection from multiple platforms and responsive interactive touch.

Cast from mobile phones, tablets and computers across Windows, iOS and Android. The display supports wireless screen casting and up to four independently shared split-screen views.

20-point
Multitouch screen

1 mm
High-precision positioning

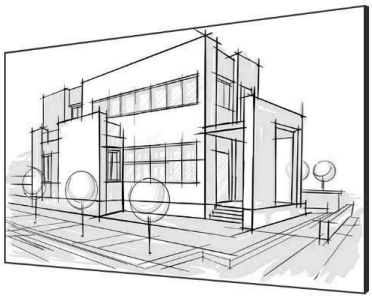

9 ms
Response delay

SMOOTH WRITING

Interactive touch provides a shared writing surface for presentations, discussions and collaborative sessions.

Modes for every environment.

Four display modes and flexible installation for different meeting scenarios.

Default mode

Ideal for most scenes.

Soft mode

Ideal for PPT and DOC display.

Cinema mode

Ideal for video and film broadcast.

Meeting mode

Ideal for teleconferencing scenes.

FREE INSTALLATION OPTION

Wall mounting

Mobile stand

Match the room to the display.

Selection guidance for meeting rooms, lecture halls and training spaces.

Screen size	Attendance	Recommended space
108 inch	20-40 people	20-50 sqm
135 inch	30-80 people	30-60 sqm
162 inch	60-100 people	60-100 sqm

APPLICATION SCENARIOS

Conference room

Direct projection from mobile phones, tablets and PCs. The source describes a dedicated projection sender for data security, digital whiteboard functionality and multi-person meetings.

Home theatre

Ultra-high-definition lossless audio and video transmission, cinema-style audiovisual playback and an optional 3D function.

Bar / KTV

Low brightness with high grey levels for dark environments, interaction, screen projection and bullet-subtitle functions.
